

ABDUL RAHMAN BAIG

Karachi, Pakistan | +92 306 1929022 | emailabdulrahmanbaig@gmail.com | github.com/Abdul-Rahman258 | linkedin.com/in/arb258

PROFESSIONAL SUMMARY

AI/ML Engineer specializing in Generative AI, Agentic AI, and Computer Vision. Proven expertise building end-to-end ML applications with Python, TensorFlow, FastAPI, and Streamlit. Won 1st place in AI Week 2026 Prompt Engineering competition. Completed 9-month Agentic AI specialization. Seeking an entry-level AI/ML Engineer role to build intelligent systems solving real-world problems.

EXPERIENCE

AI Engineer - One Digit

Karachi | Aug 2025 - Present

- Build, train, and deploy machine learning models and supporting APIs using Python, TensorFlow, and FastAPI.
- Architected end-to-end ML pipelines from data preprocessing to model evaluation and REST API serving.
- Collaborated with team on iterative model improvements, achieving production-ready ML solutions.

AI Engineer - 10Pearls

Pakistan | Apr 2026 - Present

- Develop and deploy AI-driven features for client products, focusing on practical AI integration.
- Build data analysis pipelines and design visualizations to communicate insights to stakeholders.
- Implement data-driven solutions using Python, SQL, and machine learning frameworks.

PROJECTS

Butterfly Species Recognition

- Problem: Manual butterfly species identification is time-consuming and requires domain expertise; needed an automated solution.
- Achievement: Built CNN model achieving 94% classification accuracy on 2,000+ butterfly images; deployed via Streamlit interface with FastAPI backend serving predictions in <100ms.
- Tech Stack: Python, TensorFlow, Keras, CNN, OpenCV, Streamlit, FastAPI.

Recipe Search and Management App

- Problem: Needed a backend API to efficiently search, save, and organize recipes without manual database management.
- Achievement: Developed REST API serving 50+ daily recipe queries with full CRUD operations; optimized for sub-100ms latency using MongoDB Atlas.
- Tech Stack: Python, Flask, MongoDB Atlas, REST API, JSON.

Minesweeper Game

- Problem: First standalone Python project to demonstrate game logic, state management, and user interaction patterns.
- Achievement: Implemented full Minesweeper game with grid logic, win/lose conditions, scoring system, and clean UI; tested on 1000+ game instances.
- Tech Stack: Python, Object-Oriented Programming, Game Logic.

SKILLS

Languages: Python, C++, C#, JavaScript, HTML, CSS, SQL

AI / ML: TensorFlow, Keras, Scikit-learn, OpenCV, CNNs, Deep Learning, Agentic AI, Prompt Engineering, Data Science

Backend and Web: FastAPI, Flask, Streamlit, RESTful APIs, MongoDB, SQL Server, Firebase

Tools: Git, GitHub, Jupyter, Google Colab, VS Code, CMake

EDUCATION

B.S. in Computer Science - Sir Syed University of Engineering and Technology (SSUET)

Oct 2023 - Aug 2027 (Expected)

Relevant Coursework: Data Structures, Algorithms, Databases, OOP, Linear Algebra, Web Technologies, Programming Fundamentals (Python)

CERTIFICATIONS

Professional Certification in Agentic AI (SMIT, 9-month) - AI For Everyone and Structuring ML Projects (DeepLearning.AI) - Data Science and Analytics (HP LIFE) - NAVTTC AI/ML/DL Certification - AWS AI Practitioner Challenge and AWS Scholars Program (PartyRock) - Git and GitHub (ACM SSUET)
